

# Xenon Arc Lamp Module 35W with balast

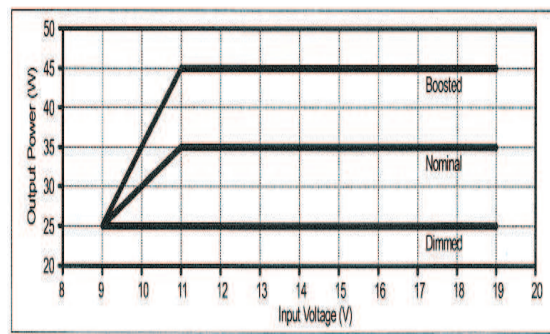

Xenon Arc Lamp Module includes balast with ignition - Ø 55x120 mm

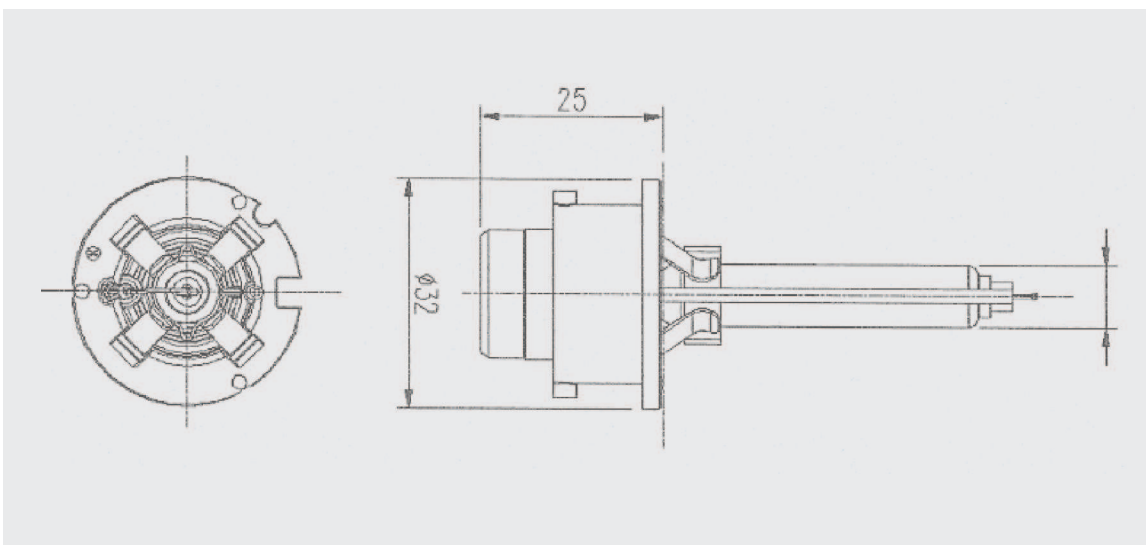

IB/E OPTICS reflector, customized optics available

Very long lifetime of about 5000h.  
Highest light performance and very small dimensions combined in one module.  
IB/E OPTICS designed reflectors to match illumination requirements.  
In consequence our lamp module is adaptable for many different uses and customized applications.  
For instance one type of reflector optimized for best light coupling into a fiber optics.  
Very efficient and compact balast with ignition and built in lamp connector from 25W up to 45W lamp power.  
Low costs by use of standard automotive lamps!  
Compact reflector calculated and manufactured by IB/E OPTICS!

Power-Curve In Relation To Battery Input Voltage

High quality automotive D2, D4 lamps
