

PLx2 Vista

Item No: 193000155500

The PLx2 Vista optical extender doubles the focal length of Vista Vision Format PL mount lenses. The extender is the sequel to our successful PLx2 adapter. Thanks to its compact optical and mechanical design, the PLx2 Vista is compatible with a wide range of lenses.

The PLx2 Vista features high-index, low-dispersion glass to ensure the highest possible resolution and contrast with minimal optical degradation. In doubling the image size, the transmitted light is spread over 4 times the area, decreasing the brightness by two f-stops. To create an optical design that is optimized for modern lenses and digital cameras, the maximum input T-Stop is 1.9.

The PLx2 Vista is designed to mount to any digital cinema camera with a native PL mount. The UMS Mount System makes it easy to change the mount to Canon EF, Sony E or others without re-shimming.

Technical data

Optical design (lenses/groups)	7/5
Max. image diameter (mm)	45.0
Magnification	x2
Max. input T-Stop	1.9
Light drop (stops)	2.0

Lens Mount	PL Standard
Camera Mount	PL UMS Mount*
Diameter (mm)	78.0
Length (mm) PL to PL	34.8
Weight (kg)	0.5

*without E Mount including inner ring, F and MFT Mount

ill.: dimensional drawing
